EDUCATION

Bachelor's of Engineering in Computer Science 2021–2025
VIT Bhopal University, Bhopal, Madhya Pradesh CGPA: 8/10

CORE TECHNICAL SKILLS

Programming Languages: C++, JavaScript, TypeScript, Python, HTML5/CSS3, SQL.
Frameworks/Tools: React.js, Angular, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, Material UI, Git, GitHub, Postman, Vite, VS Code.
APIs/Databases: REST APIs, GraphQL, Apollo Server, PostgreSQL, MongoDB.
AI/LLM Technologies: OpenAI API, Prompt Engineering, LLM-powered applications, Tool Integration, Knowledge Bases.

PROJECTS

Insurance Management Application **October 2026**
- Developed a full-stack insurance management application with authentication and role-based access control.
- Implemented core workflows for insurance policy management, claims handling, and payment processing.
- Integrated GraphQL APIs to support data exchange between frontend and backend components.

Technology Used: Angular, Node.js, Express.js, MongoDB, GraphQL, Apollo Server.

Stock Photo Gallery **July 2024**
- Developed a stock photo gallery with a responsive interface for browsing and viewing image content.
- Integrated backend APIs to connect frontend functionality with application data and gallery operations.
- Used PostgreSQL for persistent data storage and FastAPI to support backend services.

Technology Used: Next.js, JavaScript, Node.js, FastAPI, PostgreSQL.

AI Image Generator **February 2025**
- Developed a React-based interface that allows users to submit prompts and view AI-generated images.
- Integrated the OpenAI API through a Node.js backend to process user requests and support image-generation workflows.

Technology Used: React.js, Node.js, OpenAI API.

Expense Tracker Dashboard **January 2026**
- Built an expense-tracking dashboard using reusable React components and a responsive Material UI interface.
- Used Context API to manage application state and maintain consistent expense data across components.
- Integrated Recharts to visualize expense information through interactive charts.

Technology Used: React.js, TypeScript, Material UI, Context API, Recharts.

WORK EXPERIENCE

ASCENDION ENGINEERING PVT. LTD | Associate Software Engineer **July 2025–Current**

Internal Project – VS Code AI Plugin | Software Engineer
- Contribute to backend functionality and API integrations for a VS Code coding assistant with chatbot-style workflows.
- Implemented a chat-filtering feature to help user's narrow conversations and navigate chat history.
- Integrated an organization-wide API to enable users to search for and discover AI agents within the plugin.

Internal Project – Experience Studio 2.5 | Frontend Developer
- Developed and enhanced AAVA UI components for Experience Studio 2.5.
- Implemented frontend improvements to support consistent and reusable UI patterns.
- Contributed to the Design System and Workspace interfaces, improving consistency across application components.

Client Project – HP Delta | Frontend Developer
- Investigated and resolved frontend UI issues across INT and SFI environments.
- Implemented UI fixes to improve consistency and functionality across client application interfaces.

EXTRA CURRICULARS

- Responsibilities: Led content strategy and digital campaigns for technical and social impact events.
- Hobbies: Cricket, Video games, Table Tennis

ADDITIONAL TECHNICAL EXPERIENCE

- Full-Stack Development: Experience building frontend interfaces and integrating backend services using React, Angular, Node.js, and Python/FastAPI.
- API Integration: Experience working with REST APIs and GraphQL to connect application components and backend functionality.
- Development Tools: Familiarity with Git, GitHub, Postman, Vite, VS Code, and modern frontend development workflows.
